

## GADD Analytics 1.5 – Release notes 2015-01-30

GADD Analytics includes several products and this document includes the main release notes for 1.5 covers:

- GADD Dashboard Builder
- GADD Dashboard Server
- GADD Uploader
- GADD Google Analytics Extractor
- GADD Sales Analytics
- GADD Accounting Analytics

Below are notes on 1.5 highlights and please visit our site and view videos, demos and whitepapers for more information.

### GADD Dashboard Express

The GADD Dashboard Express can be downloaded from our site and includes the GADD Dashboard Builder, a Windows application, and the GADD Dashboard Viewer that makes the dashboards available via a Windows form and via your web browser.

And samples are included to illustrate how to use different features.

For making the dashboards available on your Intranet or via Internet you need the GADD Dashboard Server.

*GADD Dashboards available on any device via web browser.*

## Highlights of new features in 1.5

Below are information of new & changed features. Please download our GADD Dashboard Express to review samples on how they can be used.

### GADD Dashboard Builder

- **Colour customization.** Customize colours used in charts and pies. Define colours on dimension values and measurements to make it easier and quicker for the users to read the dashboard.
- **New Filter elements.** Use the new filter elements to create tree view, combo box or list box.
- **New Group elements.** Arrange dashboard items to customize and layout and filtering interaction inside and outside the group.
- **Column width in Grid.** Define the behaviour of grid width using auto fit manual sizing.
- **Microsoft Excel integration.** Improved integration to Microsoft Excel files. Quicker and more direct and with less dependencies to Microsoft .NET framework extensions.

### GADD Dashboard Server

- **User Authentication.** Improved integration possibilities to define user groups to steer access to dashboard and dashboard content. User authentication can be configured as a standalone solution or integrated with the Microsoft Active Directory.
- **Audit.** Know which dashboards are used most and least.
- **Dashboard configuration.** Extended possibilities for configuration on functionality using site and connection settings and styling using CSS.
- **Dashboard description.** Possibility to add dashboard description that guides the user in the objectives and content of the dashboard.
- **Microsoft IE compatibility mode.** Dashboard Filter setting can be used also when using IE in compatibility mode to support e.g. Intranets requiring IE8 compatibility.

### GADD Uploader

The GADD Uploader has been mostly used to upload Microsoft Excel files. In the 1.5 version it can do much more.

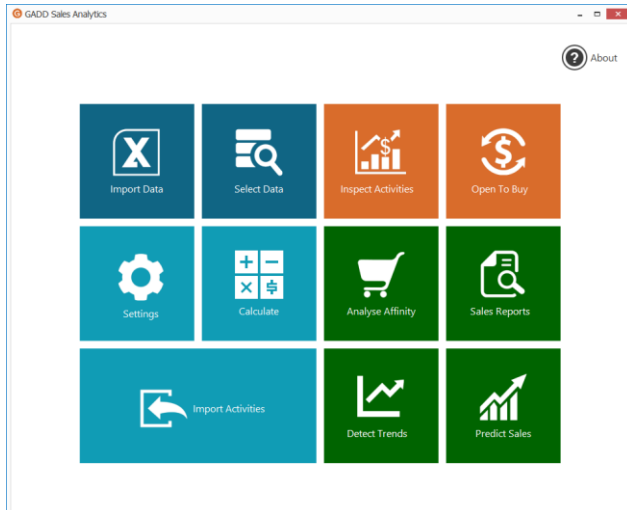

- **ETL.** It can extract and transform the data content and upload several types of files.
- **Queries.** You can configure so the data is extracted via a query (SQL statement) from one data source, transformed and saved in another data source. This makes ETL (Extract, Transform and Load) to set up in a very easy way.
- **Automatic.** Automate using e.g. Microsoft Windows Scheduler or the GADD Scheduler.

### GADD Google Analytics Extractor

The GADD Google Analytics Extractor is new in release 1.5.

## GADD Sales Analytics

The GADD Sales Analytics Windows application is new in 1.5. It complements the web based dashboards and makes it easier to configure and administrate the data and calculations.

Key features are:

- Upload tickets (receipts & orders)
- Upload sales budget, activities and add-on product definitions
- Use pre-defined calculations for affinity analysis, trend detection, etc.
- Use pre-defined dashboards publishing and analyzing
- Automated, easy and advanced at the same time

## GADD Accounting Analytics

The GADD Accounting Analytics is new and replaces the GADD SIE Analytics. Key features are:

- Upload Account information (from ledger, Coda, SIE, common interface)
- Upload your own Account grouping & profiles
- Use pre-defined calculations, trend detection and prediction
- Use pre-defined dashboards for publishing and analyzing
- Create prognosis and budget

## Teaser release 1.6

In release 1.6 we will make new features available concerning integration towards Microsoft Active Directory and SharePoint and GADD Accounting Analytics and GADD Predicts, including budget and forecast modelling, will have focus in this release.
